## **DETAILED ACTION**

## Reason for Allowance

- 1. Claims 1-21 are allowed.
- 2. The following is an examiner's statement of reasons for allowance:

The primary reason for allowance is the inclusion of a structure of a magneto-resistive random access memory having switches for providing two resistive modes to a state of a select line by having a word line provided adjacent each of a first and second magneto-resistive bits. One end of each of the magneto-resistive bits is connected to the corresponding word line, and the other end is connected to a predetermined voltage (reference voltage). Accordingly two word line current and sense line current are delivered to the first and second magneto-resistive bits.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
